

LUXX THCA

Sample

Sample ID SD230712-042 (81053)		Matrix Concentrate (Inhalable Cannabis Good)				
Distributor License 604034860		Name HIGH LYFE				
Sampled - July 2023	Received July 2023	Reported July 2023				
Angluses executed CANX. RES. MIBIG. MTO. PES. HME. FVI						

Laboratory note: The estimated concentration of the unknown peak in the sample is 6.32% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC. (+)d8-THC. (+)d8-THC is a different compound from the main (-)d8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC with the majority, if not all, of the concentration being (+)d8-THC. Total (+/-) D8 Concentration is estimated to be: 80.44%

CANX - Cannabinoids Analysis

Analyzed Jul 18, 2023 | Instrument HPLC-VWD | Method

The expanded Uncertainty of the Cannabinoid analysis is approximately ₹.806% at the 95% Confidence Level
